

Myanmar Exploration Data

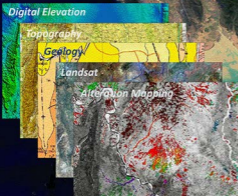

MYANMAR is a rapidly emerging precious and base metal exploration hotspot. The Exploration Mapping Group compilation provides exploration companies with a comprehensive country-wide dataset for exploration.

KEY BENEFITS include:

- Cost effective dataset for area selection, target generation and ranking
- Identification of surface alteration and potentially mineralized systems
- Planning and logistics for field mapping, geochemical sampling, geophysical surveys and drilling

DELIVERABLES include:

- Mosaic of Landsat 8 Color Composites
- Mosaic of Iron/Clay Alteration
- Radar
- Digital Elevation
- Mineral Occurrences
- Topographic Mapping
- Geology and Structures
